

# Stands up, stands out

## Connect+™ 3000 Pro

### Customer Communication Series

Your operation is different than others. You operate in a high-powered environment and can't let anything stand between you and the job at hand. Your internal and external customers are demanding and count on your team to move a lot of mail out the door efficiently and effectively. The equipment you use to get the job done needs to stand up to your tough requirements and provide all the capabilities you need.

Connect+™ 3000 Pro

## Raising the bar

We understand you. That's why we've raised the bar and created a system designed for production environments like yours. It's made tough and is the fastest in the industry. It comes complete with extra power and includes those features you demand to help you accelerate your business and workflow. The Connect+ 3000 Pro is packaged with:

- Processing power of over 18,000 envelopes per hour
- Large 15" color touch screen for easier navigation and more accessible data
- Enhanced Power Stacker handles a wider variety of material
- Total meter reporting with enterprise view of how, where and when postage is used in your organization
- Wireless keyboard with trackball for operational flexibility
- Barcode scanner for accurate tracking, reporting and routing
- Color printing on your envelopes to increase openability
- 30% discount on postal red ink cartridges

## High-powered

The Connect+™ 3000 Pro is a high-powered production system, the fastest on the market, and capable of producing over an unheard-of 18,000 envelopes per hour! It's designed to meet the high demands of a sizable operation like yours and comes complete with features and flexibility that you require.

## Integrated printers

The Connect+™ 3000 Pro has two integrated printers. One prints your postal indicias and inscriptions. The other is a 1200 dpi, high-speed printer with your choice of black or 4-process color that prints your graphics, artwork, logos and messages on demand. Reduce envelope printing costs and having to keep envelope stock on hand. This printer does it for you in print-shop quality, for less than print-shop pricing.

## Return on investment

Save direct and indirect costs by utilizing postage discounts, expanded rating capabilities, reducing envelope inventory, reducing mail creation lead times, and improving the efficiency of your mail center operations. And as a Connect+ 3000 Pro customer, you qualify for a special 30% discount on postal red ink cartridges, making your return on investment even greater.

## Color touch screen display

The hub of your system is the large, standard 15" color display. It has easy, intuitive icons and apps for navigating your system – like funds management, unlimited program-mable jobs, address verification, package tracking, buying supplies and postal tools.

## Web-enabled

Access to the Internet gives you all sorts of flexibility. You can download apps, replenish postage, access USPS® services, track packages, and go to My Account and more. The Web-based architecture allows for high-speed transfer of data and information directly to and from your system.

## Mixed mail processing

Weigh-on-the-Weigh®, along with Shape Based Rating functionality, helps you process your mixed weight and size material automatically in a single operation, giving you the utmost productivity. Each piece is weighed and measured; the proper postage is calculated and printed at speeds of up to 205 letters per minute.

## Extended power stacker

The power stacker gives you the flexibility to process mail at over 18,000 envelopes per hour, while keeping them all in presorted order.
