VERSATILE AND FLEXIBLE ADDRESSING AND IMAGING

With the SA3300 / SA3350 powerful addressing solution you can enhance your business opportunities and manage your mailstream process by creating outgoing mail that stands out to help you get the greatest return on your mailing investment. With the unique graphic and personalization capabilities of the SA3300 / SA3350, offices and departments have a hands-on tool to produce promotions and appealing customer mail in-house.

1. Media Hopper

Standard input hopper holds up to 750 #10 envelopes. Straightline paper path provides consistent and reliable operation.

2. Control Panel

Ideal for "walk-up" use. Angled control panel provides helpful prompts. Built-in sensors including indicator for low ink provides for a smoother operation.

3. Extended Printing Capability Provides Big Savings

With the additional print quality option of "light mode" the printer uses less ink. With less ink on the media, the ink dries faster and results in improved print quality and lower ink supply costs. Easy to change out cartridges.

4. Adjustable To Media Thickness & Oversized Pieces

Adjust the thickness dial to accommodate a wide variety of media including large envelopes, postcards, direct mail, booklets, newsletters, flats, catalogs, and more.

5. Optional Conveyor and Dryer

The TC36 Conveyor and TD36 Dryer with drop stacker are available as options for the SA3300 / SA3350. They provide improved drying and convenient stacking of materials for high volume runs.

SA3300 / SA3350 shown with the optional TC36 Conveyor and TD36 Dryer.

PRINT MAIL THAT GETS NOTICED AND READ

Getting your mail delivered to the right customer at the lowest postage rate is an important step for a mailing campaign.

Getting your mail noticed and opened so that your customers and prospects read your message is even more critical. Now your mail will stand out in a crowd by using powerful addressing solutions such as the SA3300 and SA3350. Make your mail work harder by offering better looking mail that gets noticed and read for improved results and cost savings.

Make Your Mail Personal

Creating envelopes and mail pieces that are more visually appealing using graphics, personalized messages and full color can help attract attention, increase the chances of your mail being opened and read, and moreover, encourage response.

Print Almost Anywhere on the Mail Piece

The SA3300 and SA3350 utilize shuttling head technology that provides the flexibility to customize your outgoing mail and maximize your messaging.

Improve the Effectiveness of Your Outgoing Mail

- Print almost anywhere on your envelope or mail piece
- Use downloadable fonts and graphic printing to make your mail stand out
- Improve your response rate and get a better return on your mailing investment
- Light mode print quality helps conserve ink usage to save you money
- Intelligent barcoding helps you qualify for postal automation discounts and helps to get your mail to its destination accurately.

THE POWER OF COLOR

Personalizing and using color on your outgoing mail just got faster and easier. With the SA3350, you can do both, making a good thing even better. Print in brilliant full color for eye-catching appeal that gets attention and makes your piece stand out in a heap of mail! Use color in your logo and graphics. Personalize using your customer's name for greater impact and effectiveness. Best of all, do all this in one pass for maximum productivity!
